White Paper NFT SENSAY (Briefly)

Main Part

Project: NFT SENSAY

Collection: 10.000 NFTs

Technical Part

Blockchain: Ethereum

Standard of Token: ERC-721

Smart contract: Ticker "SENSAY" Contract address
"0x21Abb9A32e8b9Be8B9d1632a7303F9CB21f5bCD3"

Royalty: 20% of Mint (included in the price) is financial protection
5% of the NFT purchase as a royalty
2.5% Opensea commission

Mint

Road Map: 12 phases with no more than 9.99% NFT per phase

Mint Price: Early phase 0,2 ETH

Main benefits

1. Passive income: Passive income of 10 BUD tokens per day. Payments are made thanks to a smart contract to the holder's wallet, provided by holding NFT for at least 24 hours. These tokens can be sold or exchanged for other cryptocurrencies.
2. App - Meditate to earn: The app for spiritual development and earnings in the form of a token system exclusively for NFT holders.
3. Transformation into NFT 2: The transformation of NFT SENSAY into NFT 2 thanks to the various elements.
4. Illuminated club: Joining the Illuminated club on Discord. Networking for collaborations. Future spaces in metaverse for common interests.
5. Giveaway: Participation in distribution of NFT / mystery boxes / native tokens.
6. Discussions & Voting: Participation in discussions and votes on project development. Investments in the company and shareholding.

1. Introduction / Philosophy

There are two wolves fighting in every person. One dark one symbolizes evil, the other light one symbolizes good. As a rule, the wolf that a man feeds wins.

The basis or foundation of our vision is concentration and focus on the light side, on the energy of light and the path of enlightenment.

The Buddha's philosophy is the path of his becoming, of his enlightenment. We have tried to reveal this philosophy in our NFT project.

Everything around is energy. Energy is pure and fluid. It is capable of transforming itself and taking any form.

Man has the ability to control energy. To do this it is necessary to know the basic postulates of being. The hustle and bustle of modern life drives people along a written script and they forget who they really are and why they are here. "I - am me" is the beginning of a journey of self-discovery and awareness.

The NFT project is an embodiment of the energy of light in the form of a Buddha. With this project we want to push each of us to the side of the light and conscious life. There is a Buddha in all of us.

Find your Buddha!

2. Statistics

NFT statistics #1

- More than 70% of Americans have no idea what an NFT is
- NFTs are collected by 23% of Gen Y (millennials) in the United States
- Each week, around \$10 to \$20 million in NFTs is traded on the blockchain network
- In 2020, the total value of NFT revenue was \$250 million
- The collectibles market is the most rapidly expanding
- In 2021, Over \$41 billion in cryptocurrency was spent on NFT platforms. (Chainalysis)
- The Largest NFT Marketplace is OpenSea (Medium, DappRadar)
- Ethereum 2.0 technology has the potential to cut energy consumption by more than 99% (Ethereum)
- More and more stars are immersed in the world of NFT, such as Eminem, Snoop Dogg, Britney Spears, Jimmy Fallon, Paris Hilton and others
- The NFT Market will reach \$80 Billion in worth by 2025

(By Demandsage)

The NFT market shows tremendous potential and growth in the long term. Every year there are more and more new collections that give investors the opportunity to profile in the NFT digital art market.

NFT statistics #2

As interest in NFTs has increased in recent years, so have the various types of NFTs that are now for sale. Currently, gaming and metaverse environments for NFTs are rapidly increasing in value, but they fall far short of the most popular form of NFT - collectibles.

According to NonFungible.com, people are usually most interested in buying NFTs that they can collect and keep for a long term.

Collectible NFTs are most popular

Number of non-fungible token sales in popular categories in past month

Note: Data for the month up to January 10, 2022. Data only shows transactions on the ethereum blockchain and excludes "off-chain" sales.

Statistics #3

The Lumeta ecosystem includes many projects aimed at development in the Web 3.0 space and positions itself as a metacompany. At the moment the NFT SENSAY project is being realized. Below you will find statistics on the development of the projects:

- Expected return to investors from NFT SENSAY - up to 1000%
- NFT SENSAY project is distributed in 5 languages (en, ru, ar, hi, zh)
- Distribution of the NFT SENSAY collection to different markets (America, Europe, Asia)
- 7 large scale Lumeta projects (NFTs, Crypto, Metaverse, etc) forthcoming.
- Involvement of blogger, and media personalities from YouTube and other social networks (OhhShiny, rac.eth, Farokh, NFT.NYC, BoredApeYC, The Wall Street Journal, GaryVee, NFT Times)

(By Lumeta)

3. NFT Description

An NFT (Non Fungible Token) is based on a blockchain technology and is usually understood as digital art, but this is not its only application. In the future, NFTs will enter many areas of people's lives and become a complementary part of it.

The NFT SENSAY is a collection of 10,000 unique NFT Buddhas that are part of something bigger. Owning an NFT opens up access to the Illuminated club as well as passive income in the horizon.

This project begins as an integral part of a large and interacting ecosystem - the Lumeta ecosystem. Each successive project connects to the previous one, introducing payment systems in the form of a token and its own cryptocurrency based on blockchain technology.

4. Road Map & Tokenomics

The NFT SENSAY project is implemented in 12 phases with different numbers of NFTs and their rarity.

Nr.	Name	Notes	Percentage	Amount
0	Crowdfunding	Attracting investments through Crowdfunding Platforms	5%	500
1	Foundation	Early sale of NFT for Buddha Foundation	5%	500
2	Give away	Free distribution of NFT for the fulfilled conditions	5%	500
	Partners	Free distribution of NFT for advertising and promotion of the project	5%	500
	Team	Buffer / reserve for team and project development	5%	500
3	Pre-Sale	Open pre-sale with an increase in price and NFT rarity	9,99%	999
4	Post Pre-Sale	Open post pre-sale with an increase in price and NFT rarity	9,99%	999
5	Public Sale	Open public sale with an increase in price and NFT rarity	9,99%	999
6	Post Public Sale	Open post public sale with an increase in price and NFT rarity	9,99%	999
7	Post Sale 2	Open post sale 2 with an increase in price and NFT rarity	9,99%	999
8	Post Sale 3	Open post sale 3 with an increase in price and NFT rarity	9,99%	999
9	Post Sale 4	Open post sale 4 with an increase in price and NFT rarity	7,53%	753
10	Post Sale 5	Open post sale 5 with an increase in price and NFT rarity	7,50%	750
11	Secret Sale	Secret sale with price increase and 3 ultra-rare NFTs	0,03%	3
			Sum	10.000

Prices, number of NFTs for sale and auction, and release dates for phases may vary depending on the crypto market.

5. Benefits

Main benefits

- Passive income in the form of native tokens (10 tokens/day by holding min. of 24h)
- App - Meditate to earn exclusively for NFT holders
- Transformation of NFT SENSAY into NFT 2
- Joining the Illuminated club on Discord
- Participation in distribution of NFT / native tokens
- Participation in discussions and voting on project development

Secondary benefits

The NFT SENSAY collection is not just digital art in the form of an NFT token, it is part of a huge ecosystem that will expand over time and provide more and more opportunities for users such as:

- Growing the value of each NFT
- Participation in the NFT gallery & museum
- Diversification of capital investment
- Personal avatar in the form of NFT for the metaverse
- Spiritual development through meditative practices
- Investing in the future paired with technology and Web 3.0 integration

6. Future Projects & Ecosystem

Innovative NFT 2 / 3

NFT collections have a transformation feature into a following collection, which increases their value and significance in the long term. The final Buddha collection acts as avatars for the metaverse.

Native Token

The main functions of the token system is a passive income to the owners of NFT and economic cryptosystem for payment transactions.

App - Meditate to earn

The App - Meditate to earn is a new round of development and integration of real life, crypto technologies and the path of enlightenment. The system token acts as a payment system in the app. This project opens a new stage of development and earning, bringing simplicity and genius to the whole process of meditative pastime.

Cryptocurrency

Cryptocurrency serves as the fundamental payment and economic cryptosystem of the metaverse. The core of the entire system is based on its own, new and innovative blockchain, which solves the current problems of networks, such as, decentralization, speed and security. The solution to these problems is to harmonize processes and strive for a unified whole, namely the simplification of the entire process chain, transparency and ease of transaction processing, as well as the ability to multi-communicate with the surrounding networks. In anticipation of the development of quantum computers and supercomputers, our security system allows the blockchain system to function freely and properly.

SWAP and Exchanges

An exchanger that allows you to make profitable transactions in a fast and transparent manner. Our solution solves several problems at once, namely the speed of transactions, reliability of services and the absence of commissions to create a free platform for the exchange of digital assets.

Marketplace

Like many of our projects, our Marketplace follows the principles of transparency, simplicity, reliability and ease of use. The basic functions of the Marketplace are exchange, buying / selling, auctions, crowdfunding and creation of crypto assets. The main function of the Marketplace is crypto integration of real objects into the digital world through the use of crypto technologies. It is the world's first Web 3.0 marketplace projected into our world.

Metaverse

The metaverse, metaspaces or metaworld is more than just meta. It is an environment that allows and opens up a whole new level of human-space interaction. Lumeta metaverse includes a huge list of possibilities for users to self-realization and self-development, from communication through sensory assistive systems, all the way up to creating one's own digital copy. The system solves a number of contemporary problems, viz:

- Reducing the consumption of the planet's resources by interacting in metaspaces
- Accessibility of knowledge and education through the openness of the system
- Development and enlightenment of individuals through the study of the practices of enlightenment of human creation
- Integration of modern businesses in the Web 3.0 space
- Artificial intelligence for data analysis and selection
- Basic income while being in the metaverse

7. Team

The team's founding date is March 2022.

Our core team consists of 7 people includes innovators, IT- programmers, designers, smart-contractor, Web3 and marketing specialists. There are more than 25 other hired employees around the world.

8. Acknowledgements

We would also like to express our gratitude for your time and interest in our company Lumeta as well as in our project, the NFT SENSAY collection.

Your support is very important to us and we will be very grateful for your investment in us. We also welcome the program of cooperation and complicity in the development of the company with large investments from investors.

The LUMETA Team
